EDUCATION

CASET College of Computer Science, Jammu and Kashmir Srinagar, JK
Bachelor of Computer Applications *Aug. 2021 – Aug 2024*

Tyndale Biscoe School, Jammu and Kashmir Srinagar, JK
HSC (10+2) *Passed: November 2019*

EXPERIENCE

Senior Code Instructor April 2024 – November 2024
ILS Srinagar *Srinagar, JK*

- Taught the MERN stack (React, Node.js, Express, MongoDB), delivering comprehensive lessons and hands-on coding sessions.
- Trained and mentored junior developers, helping them build full-stack applications with industry best practices.
- Designed structured curriculums, coding challenges, and interactive projects to enhance problem-solving skills.
- Conducted 9-hour continuous coding sessions, balancing theory, debugging, and real-world project development.
- Provided one-on-one mentorship, troubleshooting complex coding issues and guiding students in real-time debugging.

PROJECTS

MediGo ERP | *React, Tailwind, Shadcn UI, Tailwind, Express.js, Full-Stack*
- MediGo ERP is a full-stack application designed for medical shops, built using React for the front-end and Express.js for the back-end.
- Developed a RESTful API to manage medicines, suppliers, billing, and sales, enabling seamless data handling.
- Implemented file read/write storage for offline data persistence, ensuring functionality without an internet connection.
- Designed the system with scalability in mind, with plans to transition from offline storage to a cloud-based database.
- Demonstrates expertise in full-stack development, API design, state management in React, and efficient data handling.

Habit Tracker (Link) | *React, ContextAPI, Chart.js, Responsive Design*
- Habit Tracker is a full-stack application built with React, leveraging the Context API for efficient global state management.
- Utilizes Chart.js for interactive data visualization, enabling users to track and analyze habits effectively.
- Features reusable components and a responsive design, ensuring a seamless user experience across devices.
- Optimized for performance and scalability, showcasing modern front-end development techniques.
- Demonstrates expertise in state management, data visualization, and component-based architecture in React.

Omnifood Clone (Link) | *HTML, CSS, JavaScript, Responsive Design*
- Omnifood Clone is a modern, responsive food delivery website built with HTML, CSS, and JavaScript.
- Implements meal subscriptions, advanced filtering options, and dynamic animations for an engaging experience.
- Features reusable components and a responsive design, ensuring a seamless user experience across devices.
- Features an intuitive UI/UX design, interactive components, and smooth navigation optimized for mobile responsiveness.
- Features an intuitive UI/UX design, interactive components, and smooth navigation optimized for mobile responsiveness.

TECHNICAL SKILLS

Languages:C/C++, SQL (Postgres), Advance JavaScript, HTML/CSS, C Sharp, Web Assembly(WASM)
Frameworks: React, Node.js, Express.js, WordPress, Material-UI, Tailwind, Bootstrap, Next.js
Developer Tools: Advance Version Control(Git), VS Code, Linux
Cloud/Databases: Relational Database (mysql), MongoDb, PostgreSQL
